Lincoln, NE 68508

RE: 600 Fletcher Ave., Lincoln, Nebraska 68521 - LIN021c

Dear Ms. Dam:

The following is the Personal Wireless Service Facilities Application Requirements as per your request.

- The record owner is Francis & Evelyn Moles, husband and wife, as joint tenants, 600 Fletcher Ave., Lincoln, Nebraska 68521.
- The statement of permission is enclosed.
- The type of site we are proposing is a monopole.
- The Metes and Bounds description has been enclosed in the drawing package.
- The Plot Plan has been enclosed.
- There are digital photographs, some representative of sight lines.
- The Site Elevation has been enclosed in the drawing package.
- Before and after photographs have been enclosed.
- The landscaping plan is including in the "Drawing Package" and meets all the requirements of Lincoln's "Design Standards for Screening and Landscaping" Section G. 9. Broadcast Towers
- The proposed site is zoned AG. This site is considered a "Sensitive" site, as defined in Section 27.68.080 (C), as there are other towers within ½ mile from the proposed site, and it is located in an entryway corridor. We have made good faith efforts to co-locate on all of the three other towers located in this vicinity, but were unable to. First is the Alltel tower located at 7th & Fletcher. We have a lease with Alltel on this site and have even received an Administrative Permit, No. 00014. Before filing an application, we perform a structural analysis on the tower to insure that it is structurally safe to handle the weight of our equipment, which it did. Before we were able to execute the lease and zone our equipment, AT&T went on the tower. We then had to perform a second structural analysis, but found the tower was unable to handle the weight of Qwest's equipment. We had a second structural company perform a new analysis, but the results are the same. I have enclosed the most recent copy of the structural analysis for review. The second tower is owned by Sprint and the third tower is owned by Western Wireless. These towers have been found technically infeasible, and are explained in the section "RF Explanations." As a good faith effort, we have submitted an application to Western Wireless to co-locate on the tower, along with an application-processing fee. Copies of the application have been enclosed for review, along with an email from the company explaining the timeline for applications. The proposed site does help to "cluster" the vertical mass of existing and proposed structures. The tower will

also be made co-locatable for two other like carriers, eliminating the need for more towers in the future.

- Equipment information has been enclosed.
- A colors and material brochure has been enclosed.
- There will not be any fencing or illumination on the monopole, unless FAA requires a light on top of the pole. The finish color will be galvanized for the monopole and neutral green for the equipment box. The base of the tower will be screened by the landscaping required under Lincoln's "Design Standards for Screening and Landscaping" Section G. 9. Broadcast Towers.
- Since there are already three towers in the vicinity, the fourth tower will not have a major impact on the surrounding areas. The proposed site helps to "cluster" the vertical mass of the existing and proposed structures. The design of the monopole is slim, since we don't run coax through the inside. We need a height of 123', still giving room for up to two other like carriers to locate on this tower. That would also help to minimize the obtrusiveness for when future providers come into the area. There will not be any artificial light or color provisions on this tower.
- Copies have been enclosed labeled as Environmental I & II Documents
- All sites are screened for FAA requirements; and for any site requiring FAA registration, its approval will be provided at the time of obtaining a building permit. A letter has been enclosed summarizing the screening result, namely that it is in compliance with FAA regulations, along with backup data from the screening program.
- A statement of co-location is enclosed under "Permission." Nextel and Cricket have both been contacted about co-located on this site, but at this time, are not interested in giving us a letter of intent.
- We are requesting a waiver of the fall zone requirement. We do meet all the setbacks on the property
- A Pole Calculation has been included to demonstrate the safety of the monopole.
- The installation is designed to withstand 100 m.p.h. winds, and is included in the Pole calculation.
- The inspection and maintenance program will follow the EIA Maintenance List, which has been enclosed.
- Upon completion of the city approval process and at the time of obtaining a building permit, the following items will be recorded at the Register of Deeds: A Memorandum of Agreement with the property owner along with any access or utility easements. These items are filed at this time in order to avoid encumbering the landowner's title prematurely.
- A Performance Bond in the amount of \$35,000.00 has been included as surety for the facilities located at 600 Fletcher Ave., Lincoln, Nebraska 68521, the address of this application.
- The Applicant understands that the Lincoln Ordinance, by which this application is reviewed and approved, also contains indemnity documentation that establishes an agreement between the Applicant and the City of Lincoln, as a condition of this application's approval according to the Ordinance.

This should be all the information as required by the checklist. If you have any questions, please feel free to contact me on my mobile at (402) 290-6533.

Thank you,

Jill Bazzell
Real Estate Consultant
Qwest Wireless, L.L.C.

Personal Wireless Service Facilities
Application Requirements
Lincoln, Nebraska

Site Name and Number: **Moles, LIN021c**

- ☐ Applicant name, title, company name, address, phone.

☐ **Comments:**

1860 Lincoln, Fourteenth Floor
Denver, Colorado
Office Phone: (720) 947-1620

- ☐ Owner and operator company name, contact name, title, address, phone.

☐ **Comments:**

Steven M. Mangold
Regional Real Estate Manager
Qwest Wireless, L.L.C.
426 North Fairview, Room 101
St. Paul, Minnesota 55104
Office Phone: (651) 642-6016

- ☐ Record owner(s) of property with name, address and phone from abstractor or attorney.

☐ **Comments: Francis & Evelyn Moles, 600 Fletcher Ave., Lincoln, NE 68521**

- ☐ Statement of permission signed by record owner(s).

☐ **Comments: Enclosed under "Permission"**

- ☐ Type of Site:

☐ **Monopole**

- ☐ Metes and bounds description of special permit area, including tower, base equipment, parking, security barrier and landscaping. This must refer to the legal description of the property including lot, block, subdivision, section, township, range.

☐ **Comments: This information has been included in the drawing package.**

- ☐ Plot Plan showing the following:

- ☐ Tower, antenna, antenna support structure, building fencing, buffering, access, etc.
- ☐ Drawn to an engineer's scale so as to be legible
- ☐ Lot lines
- ☐ Lease area lines
- ☐ Dimensions of lease area
- ☐ Distances from lease area to property lines
- ☐ Specific locations and dimensions of all proposed structures and equipment
- ☐ Distance from all proposed structures and equipment within the lease area to the boundary of the lease area

- ☐ Distance from all proposed structures and equipment within the lease area to the property lines
 - ☐ Location of all existing structures on the property
 - ☐ Distance from the lease area to the existing structures
 - ☐ If existing structure is within lease area, distance from proposed to existing structures
 - ☐ Location of proposed guy wires
 - ☐ Proposed security barrier, including type, extent and point of controlled entry
 - ☐ Indication of anti-climbing devices on the tower, or a notation that no climbing devices will be placed on the tower below 20 feet
 - ☐ Galvanized finish of tower
 - ☐ Lighting
 - ☐ Flush mounting of screening of antennae to walls
 - ☐ Architectural compatibility, construction, painting, or screening of antennas to match with building and/or wall on which it is mounted
 - ☐ Indication of similar color and texture of equipment buildings mounted on a roof to exterior building walls
 - ☐ Complete screening from view of roof mounted antenna and base stations by materials that are consistent and compatible with the design, color, materials, and design of the building
 - ☐ Type of antennae – whip (no more than 7' diameter) or panel (no more than 2' x 8')
 - ☐ Notation that antenna and support structure will be designed to withstand wind force of 100mph without use of guy wires
 - ☐ Location of all roads
 - ☐ Location and dimensions of access to proposed facility
 - ☐ Location and dimensions of parking to service the facility
 - ☐ Location of existing trees and shrubs
 - ☐ Location of other significant existing site features
 - ☐ Proposed changes to the existing property including grading, vegetation removal, roads or driveways
 - ☐ Zoning of site
 - ☐ Zoning and land uses of adjacent properties
 - ☐ Ground space for future carrier's equipment (1 if up to 100 feet, 2 if over 100 feet)
 - ☐ Space on support structure for future carrier's antennas
 - ☐ Flood plain information, including elevation of platform, generator, and fuel tank, and a notation that the tower will be designed to prevent collapse or lateral movement in the event of a flood, constructed with materials and utility equipment resistant to flood damage, and constructed by methods and practices that minimize flood damage
 - ☐ **Comments: Plot plan information has been provided in the drawing package.**
- ☐ **Sight Lines Representation:**
- ☐ Each in profile and at a legible scale
 - ☐ From any public or private road within 300 feet of the facility to this highest visible point of the facility
 - ☐ From the viewpoint of each residential building within 300 feet of the facility to the highest visible point of the facility
 - ☐ Showing all intervening trees and buildings
 - ☐ If there is only one residential building within 300 feet, then at least two site lines from the closest habitable structures or public roads
 - ☐ If there is a public view corridor (Capitol View, entrance to city, view of City Landmark, vista) within 100 feet, the elements of the proposed facility that can be viewed from this public space or vista point
 - ☐ **Comments: Digital photographs, some representative of sight lines, have been provided.**
- ☐ **Sitting Elevation:**
- ☐ Dimensioned and to scale
 - ☐ From north, south, east and west
 - ☐ From all existing public and private roads that serve the property
 - ☐ For a 50 foot radius around the proposed facility
 - ☐ Showing:
 - ☐ Antennas, mounts, equipment enclosures, security barrier, platforms, cable runs, parking areas, and other construction or development with elevation dimensions to the highest point
 - ☐ If the security barrier blocks views of the facility, it should be cut away to

show the view behind the barrier

- ☐ All existing structures on the property
- ☐ Existing trees and shrubs at current height
- ☐ Proposed trees and shrubs, with approximate heights and time of installation dimensioned
- ☐ Grade changes, or cuts and fills, to be shown as original and new grade lines with two foot contours above mean sea level

☐ **Comments:** Site elevation information has been provided in the drawing package.

☐ **Photographs:**

- ☐ Before photo of each sight line from any public or private road within 300 feet, in color, 8½ by 11
- ☐ After photos showing antennas, mounts, equipment, cables, and security barrier, in scale with the scale indicated on the photo, from public roads and residential buildings within 300 feet
- ☐ **Comments:** Before and after photographs have been included as an exhibit.

☐ **Landscape Plan:**

- ☐ Meeting design standards and drawn to scale
- ☐ Showing:
 - ☐ Location and type of proposed landscape material
 - ☐ Method of planting
 - ☐ Number, botanical name, common name, design height, and design spread of material
- ☐ Plant material shall be selected from the "Plant Material List"
- ☐ **Comments:** The landscaping plan is including in the "Drawing Package" and meets all the requirements of Lincoln's "Design Standards for Screening and Landscaping" Section G. 9. Broadcast Towers

☐ **Location Preference statement:**

- ☐ "Preferred"
- ☐ If not "Preferred", the statement should describe:
 - ☐ Whether any Preferred Location Sites are located within the geographic service area
 - ☐ What good faith efforts were taken to investigate each preferred site, and why such efforts were unsuccessful
 - ☐ Why each Preferred Location was not technologically, legally or economically feasible
 - ☐ How and why the proposed site is required to meet service demands for the geographic service area and citywide network
 - ☐ The distance between the proposed facility and the nearest residential unit, and residentially zoned properties
- ☐ Sites in "Sensitive" locations will be considered only if the applicant:
 - ☐ Provides evidence showing what good faith efforts and measures were taken to secure a preferred or limited preference site within ½ mile of the facility, and
 - ☐ Demonstrates with engineering evidence why each such preferred or limited preference site was not technologically, legally or economically feasible

☐ **Comments:** The proposed site is zoned AG. This site is considered a "Sensitive" site, as defined in Section 27.68.080 (C), as there are other towers within ½ mile from the proposed site, and it is located in an entryway corridor. We have made good faith efforts to co-locate on all of the three other towers located in this vicinity, but were unable to. First is the Alltel tower located at 7th & Fletcher. We have a lease with Alltel on this site and have even received an Administrative Permit, No. 00014. Before filing an application, we perform a structural analysis on the tower to insure that it is structurally safe to handle the weight of our equipment, which it did. Before we were able to execute the lease and zone our equipment, AT&T went on the tower. We then had to perform a second structural analysis, but found the tower was unable to handle the weight of Qwest's equipment. We had a second structural company perform a new analysis, but the results are the same. I have enclosed the most recent copy of the structural analysis for review. The second tower is owned by Sprint and the third tower is owned by Western Wireless. These towers have been found technically infeasible, and are explained in the section "RF/RE Explanations." As a good faith effort, we have submitted an application to Western Wireless to co-locate on the tower, along with an application-processing fee. Copies of the application have been enclosed for review, along with an email from the company explaining the timeline for applications. The proposed site does help to "cluster" the vertical mass of existing and proposed structures. The tower will also be made co-locatable for two other like carriers, eliminating the need for more towers in the future.

- ☐ Equipment brochures:
 - ☐ Antennas
 - ☐ Antenna mounts
 - ☐ Equipment shelters
 - ☐ Cables and cable runs
 - ☐ Security barrier
 - ☐ Other materials of the proposed facility, specified by generic type and specific treatment (e.g. stained wood, anodized aluminum)
 - ☐ **Comments: Equipment information has been included as an exhibit. (See "Equipment Info" exhibit.)**
- ☐ Color Board:
 - ☐ Colors and materials represented by a color board showing actual colors proposed of:
 - ☐ Antennas
 - ☐ Antenna mounts
 - ☐ Equipment shelters
 - ☐ Cable runs
 - ☐ Other construction
 - ☐ **Comments: An exhibit has been included featuring the details of our equipment. (See "Colors & Materials" exhibit.)**
- ☐ Security Barrier Description:
 - ☐ Should include method of fencing, finished color, method of camouflage, and illumination
 - ☐ Address screening of both equipment and tower base
 - ☐ **Comments: There will not be any fencing or illumination on the monopole, unless FAA requires a light on top of the pole. The finish color will be galvanized for the monopole and neutral green for the equipment box. The base of the tower will be screened by the landscaping required under Lincoln's "Design Standards for Screening and Landscaping" Section G. 9. Broadcast Towers**
- ☐ Statement indicating measures designed to minimize potentially adverse effects on adjacent properties
 - ☐ Should give consideration to design, unobtrusiveness, minimum height necessary to accommodate the antenna, avoidance of artificial light, and coloring provisions
 - ☐ **Comments: Since there are already three towers in the vicinity, the forth tower will not have a major impact on the surrounding areas. The proposed site helps to "cluster" the vertical mass of the existing and proposed structures. The design of the monopole is slim, since we don't run coax through the inside. We need a height of 123', still giving room for up to two other like carriers to locate on this tower. That would also help to minimize the obtrusiveness for when future providers come into the area. There will not be any artificial light or color provisions on this tower.**
- ☐ Maintenance and monitoring program for antennae and equipment
 - ☐ Include frequency of maintenance services, back-up plans for disruption of service due to repair, and maintenance or monitoring activities
 - ☐ **Comments The inspection and maintenance of the equipment will be performed by field engineers who follow a regular routine for inspection, usually in four- to six-week cycles. They also perform regular service internally with the appropriate software. Major problems, while considered to be infrequent, will be attended by backup arrangements prepared to treat each problem according to the characteristics of the problem.**
- ☐ Copies of environmental documents required by any federal agency
 - ☐ **Comments: Copies have been provided as an exhibit. (See Environmental #1 & #2" exhibits.)**
- ☐ Copies of any required FAA, state or local aviation documents
 - ☐ **Comments: All sites are screened for FAA requirements; and for any site requiring FAA registration, its approval will be provided at the time of obtaining a building permit. A letter has been enclosed summarizing the screening result, namely that it is in compliance with FAA regulations, along with backup data from the screening program.**
- ☐ Co-location statement
 - ☐ Also included in lease

- ☐ Comments: **Enclosed under "Permission."** Nextel and Cricket have both been contacted about co-located on this site, but at this time, are not interested in giving us a letter of intent.
- ☐ Fall Zone/Setbacks:
- ☐ If the tower or equipment does not meet the required fall zone or setbacks for that area, a statement requesting relief from that requirement
 - ☐ Comments: **We are requesting a waiver of the fall zone requirement. The proposed site does meet all the setbacks on the property.**
- ☐ Demonstration that the antenna and support structure are safe, and the surrounding areas will not be negatively affected by support structure failure, falling ice, or other debris
- ☐ Comments: **Enclosed under "Pole Calculations"**
- ☐ Demonstration that the antenna and support structure will be designed to withstand a wind force of 100 miles per hour without the sue of supporting guy wires
- ☐ Comments: **The installation is designed to withstand 100 m.p.h. winds. (See "Equipment Info" exhibit.)**
- ☐ Demonstration why it is necessary from a technical standpoint to have a tower within ½ mile of any other tower
- ☐ Comments: **Enclosed under "RF/RE Explanations"**
- ☐ Evidence that the tower will be constructed and maintained in compliance with EIA standards
- ☐ Comments: **An exhibit has been included indicating a checklist for maintaining and inspecting the structure according to EIA standards. (See "EIA Maintenance List" exhibit.)**
- ☐ A statement indicating that the easements or licenses on the site plan will be recorded with the Register of Deeds
- ☐ Comments: **Upon completion of the city approval process and at the time of obtaining a building permit, the following items will be recorded at the Register of Deeds: A Memorandum of Agreement with the property owner along with any access or utility easements. These items are filed at this time in order to avoid encumbering the landowner's title prematurely.**
- ☐ Surety Documentation
- ☐ In a form approved by the City Attorney, in an amount as determined by the City that guarantees the removal of the facility and the restoration of the property to its original condition, and to guarantee the installation of landscaping
 - ☐ Amount of bond, \$ 35,000.00
 - ☐ Comments: **A Performance Bond in the amount of \$35,000.00 has been included as surety for the facilities located at 600 Fletcher, Lincoln, Nebraska 68521, the address of this application.**
- ☐ Indemnity Documentation
- ☐ In a form satisfactory to the City Attorney, that the permitted, successors and assigns shall, at its sole cost and expense, indemnify and hold harmless the City, its officers, officials, boards, commissions, agents, representatives, and employees against ant and all claims, suits, losses, expenses, causes of action, proceedings, and judgements for damage arising out of, resulting from, or alleged to arise out of or result from the construction, operation, repair, maintenance or removal of the provider's facilities. Indemnified expenses shall include, but not be limited to, all out-of-pocket expenses, such as costs of suit and defense and reasonable attorney fees, and shall also include the reasonable value of any services rendered by the City Attorney's office and employees of the City and any consultants retained by the City.
 - ☐ Comments: **The Applicant understands that the Lincoln Ordinance, by which this application is reviewed and approved, also contains indemnity documentation that establishes an agreement between the Applicant and the City of Lincoln, as a condition of this application's approval according to the Ordinance.**

September 18, 2000

RF Report for LIN021 (600 Fletcher Ave.)

1. **Coverage Objective:** This site should cover I-80 from the North 56th Street Exit to 1 mile west of the 9th Street exit. It should also cover I-180 south to Adams street, and Hwy 34 as far west as possible to extend Qwest footprint.

2. **Alternate Locations**

A. **Western Wireless tower at 14th and Fletcher**

1. This tower is too far East to attain proper coverage on I-180 due to a ridge just West of the 9th Street exit.

B. **Sprint tower at 14th and Fletcher**

1. Same coverage issues as Western Wireless. Also, this pole is too short, extension to 120' is not feasible, so it would require replacement.

C. **Alltel tower at 7th and Fletcher**

1. This site was actually approved by zoning, and Qwest was willing to colocate. Unfortunately the pole was not structurally strong enough to support Qwest equipment in any configuration. Therefore another pole was required to attain Qwest coverage objectives.

3. **Advantages of chosen location**

A. **Coverage of I-80**

1. The chosen location covers I-80 from the 56th Street exit to approximately one mile west of the 9th Street exit.

B. **Coverage of I-180 / HWY 34**

1. This location also meets all coverage objectives on I-180 south and Hwy 34 going west and north.

4. **Conclusion**

- A. **The site at 600 Fletcher Street is the best site to achieve engineering coverage objectives in this area.**

RE: 600 Fletcher Ave. -- LIN021c

Dear Ms. Dam:

The Alltel site at 7th & Fletcher has been ruled out as a candidate for structural reasons. We have a lease with Alltel on this site and have even received an Administrative Permit, No. 00014. Before filing an application, we perform a structural analysis on the tower to insure that it is structurally safe to handle the weight of our equipment, which it did. Before we were able to execute the lease and zone our equipment, AT&T went on the tower. We then had to perform a second structural analysis, but found the tower was unable to handle the weight of Qwest's equipment. We had a second structural company perform a new analysis, but the results are the same. I have enclosed the most recent copy of the structural analysis for review.

The next enclosure is a copy of a co-location application that Qwest Wireless, L.L.C. has submitted to Western Wireless regarding their tower at 11th & Fletcher. Even though the site has been ruled out for RF Reasons, we applied for the co-location as a good faith effort.

Thank you,

Jill Bazzell
Real Estate Consultant
Qwest Wireless, L.L.C.

Kelly,

You have tower located in the area of 7th & Fletcher Streets in Lincoln Nebraska. Our RF engineers need some information on this tower so they can determine the feasibility of colocating on this tower.

The information required would be the Lat & Long, Ground Elevation, Height of the tower and the heights available on this tower.

I appreciate your assistance on this matter and was pleased to hear from you so quickly today.

Thank you,

Ed O'Keefe

To: "jbazzel@uswest.com" <jbazzel@uswest.com>

Jill,

Per our conversation, a typical collocation process takes about 90 days...we are expecting delays due to an overwhelming demand for collocation.

I spoke with Craig Vogt, Regional Project Manager for Nebraska and we will try to expedite as soon as possible; Trying to accommodate Quest Communications and the City Council.

Please find attached Western Wireless' External Collocation Guide, Site Access & Contact Form, Technical Data Application; All to be returned to my attention along with Application Fee.

Thank you,

Kelly Lavery

EXTERNAL COLLOCATION PROCESS

CHECK LIST GUIDE

PRELIMINARY APPLICATION REVIEW PROCESS

- ☐ Submit written "Letter of Request" to collocate: Site specific information to include: RSA, Site Name, Site Coordinates, Legal Address & Tower Registration Number.
- ☐ Complete "Technical Data Application" (TDA).
- ☐ Submit TDA to Western Wireless National Collocation Coordinator (NCC) electronically, as well as a hard copy & required Application Fee to:
kelly.lavery@wwireless.com
Kelly Lavery, National Collocation Coordinator,
3650 131st Avenue, SE, Suite 400, Bellevue, WA 98006
Ph: 425-586-8725 or Fax: 425-586-8050
- ☐ Receive "Confirmation of Application" and attached "External Collocation Process Guide".
- ☐ Receive "Site Documentation Packet" with Entitlements pending further review of application.

PRELIMINARY SYSTEM DEVELOPMENT SITE DESIGN WALK

- ☐ Contact Regional Project Manager (RPM) to schedule (following receipt of a COPY "Site Documentation Packet" [SDP]). The RPM will receive the ORIGINAL "SDP" for applicable note taking & original signatures.
- ☐ Be prepared and flexible in scheduling a time with WWC RPM, PM & or Site Cell Tech.
- ☐ Bring a set of Architectural & Engineering drawings to redline & the SDP to follow process & take notes.
- ☐ Authorize & Sign ORIGINAL Preliminary designated areas with RPM.

SITE DEVELOPMENT DOCUMENTATION REVIEW

Please review the Preliminary Site Design Walk notes, make appropriate changes and make sure that the following items are completed and sent to Regional Project Manager (original drawings) with a copy to Nat'l Collocation Coordinator (reduced size drawing):

- ☐ Amended construction drawings including changes referenced at preliminary site design walk.
- ☐ Structural analysis.

LEASE NEGOTIATION

To expedite the lease negotiation process by Western Wireless please make sure that the following items are completed and attached prior to shipment:

- ☐ Four properly signed and notarized original lease agreements.
- ☐ Completed legal description and site / tower plan on all lease agreements.
- ☐ Copy of Prime Lease Agreement with landlord.
- ☐ Corporate (or equivalent) resolution authorizing signatory.
- ☐ Initial First Month's Rent & Site Walk one-time RPM Fee forwarded to NCC prior to issuance of NTP.

COMMENCEMENT

- ☐ One original executed lease will be forwarded to you.

NOTICE TO PROCEED Prerequisite

Copies of all governmental approvals will be required prior to issuance of the NTP, including, but not limited to:

- ☐ Yes ☐ No ☐ N/A ☐ SITE ACCESS & CONTACT FORM

CONSTRUCTION INSTALLATION

- ☐ Schedule Installation Date with Regional Project Manager.
 (The RPM is required to be on site days of installation or WWC Project Manager or equivalent to supervise construction, at a Daily PM Rate of \$500.00).

POST CONSTRUCTION SITE DESIGN WALK

- ☐ Approve ORIGINAL Post Construction Site Walk Design Abstract #2.
☐ Please provide the WWC RPM & Nat'l Collocation Coordinator with (reduced) as-built drawings within 15-30 days after Post Construction Walk.
☐ WWC Regional Project Manager reserves the right to redline drawings at Post Construction Site Walk. Any necessary changes will be noted
 (Timelines for the above adherence will be within 30 days; Thereafter 25% of monthly rent will be charge daily as a Late Fee).

Re: NELI Fletcher

Dear Jill :

Thank you for your interest in collocating on the above stated WWC communication site. Please consider this letter to be confirmation receipt of Qwest Wireless, L.L.C.'s request to locate on the above site. Enclosed find the "Technical Data Application" used for applying to lease space at any of Western Wireless Corp.'s existing cellular towers.

Please complete appropriate information and return to:

Western Wireless Corp.
Attn: Kelly Lavery
3650 131st Avenue SE, Suite 400
Bellevue, WA 98006
Phone: 425-586-8725 Fax: 425-586-8050 Email: kelly.lavery@wwireless.com

This document was prepared as a "Form" which will allow you to complete it on your computer by simply tabbing to each line.

ALL SECTIONS MUST BE COMPLETED (A separate document should be completed for each location).

The below fees are to be sent to the above address:

- "APPLICATION PROCESSING" fee of FIVE HUNDRED DOLLARS (\$500.00) per location to be returned with completed "Preliminary Technical Application".
- "SITE WALK REGIONAL PROJECT MANAGEMENT" fee of ONE THOUSAND DOLLARS (\$1,000.00) per location to be submitted at the time of "Lease Commencement" along with "Initial Monthly Rent".
- "DAILY PROJECT MANAGEMENT INSTALLATION" Fee of FIVE HUNDRED DOLLARS (\$500.00) per location to be submitted with "Post Construction Site Walk" & Actual as-built Drawings.

- (1) Non-Refundable.
- (2) Credited to the non-recurring charge.

Please note that Western Wireless primarily prefers to install and construct work associated with its WWC tower facilities and is the discretion of the Regional Project Manager's approval at the time of scheduled "Preliminary Site Walk". WWC will provide you with a list of approved contractors if you choose.

We at Western Wireless look forward to working together. Should you have any questions, feel free to contact me at the numbers listed above. Once again, thank you.

Sincerely,

Kelly

Kelly S. Lavery

PRELIMINARY REVIEW

For consideration, Western Wireless **REQUIRES** the following information to evaluate collocation request:

- Sketch of tower indicating existing and proposed antennas (choose the most appropriate attached tower drawing to modify).
- Sketch of site compound indicating existing and proposed structures.
- Specification sheets/Pictures of antennas (including radiation pattern), mounting bracket(s), coaxial cable, and base station equipment & shelter.
- Completed "Site Access & Contact Form"

Technical Data Sheet

U S WEST Wireless has the following parameters in Nebraska:

PCS D block, actual channels used: 325, 350, 375

MicroBTS Tx frequencies: 1946.25MHz, 1947.5MHz, 1948.75MHz

MicroBTS Rx frequencies: 1866.25MHz, 1867.5MHz, 1868.75MHz

Modulation: Direct Sequence Spread Spectrum

Standard: J-STD-008 and J-STD-019

Maximum EIRP: +56.7dBm (39.7dBm + 17dBi antenna gain)

Channel Bandwidth: 1.2388MHz

Antenna Information: Ball PCS-DS-17-06507 or PCS-VR-18-06507

Antenna Size (PCS-DS-16-09007)

Gain = 16 dBi 48" x 8.1" x 2.3"

Azimuth beam width = 90° | Weight ~ 10.2lb without

Elevation beam width = 7° | mounting hardware

Antenna Size (PCS-DS-17-06507)

Gain = 17 dBi 48" x 7.2" x 2.3"

Azimuth beam width = 65° | Weight 10.2lb without

Elevation beam width = 7° | mounting hardware

Antenna Size (PCS-VR-18-06507)

Gain = 17.5 dBi 48" x 7.3" x 2.2"

Azimuth beam width = 65° | Weight ~ 8lb without

Elevation beam width = 7° | mounting hardware

Standard Antenna Configuration:

1 or 2 antennas per sector

Horizontal Spacing (if required) 4ft to 8 ft depending on antenna height

Governing FCC Rules:

Code of Federal Regulations

Title 47 (Telecommunications)

Part 15 and Part 24 (subpart E)

Out of Band Emissions:

Section 24.238 (a) On any frequency outside a licensee's frequency block, the power of any emission shall be attenuated below the transmitter power (P) by at least $43 + 10\log(P)$ dB. This is an FCC requirement.

Below are the equipment specifications:

For A & D 20MHz (Partial Band) MicroBTS –
(Tx out of block spurious emissions shall meet)

150dBm/Hz for $f < 1850$ MHz

174dBm/Hz for $f=1850\text{MHz}$ to $f=1870\text{MHz}$
150dBm/Hz for $f>1870\text{MHz}$ to $f=1910\text{MHz}$
100dBm/Hz for $f=2010\text{MHz}$ to $f=3000\text{MHz}$

AC Power Requirements:

90/260 VAC, 47-63Hz, single phase, 925 Watts for a three sector-site

Nominal Dimension:

33" x 17" x 9¼"

(Main and Remote Units)

(1 Main unit and 3 remote units for a 3 sectored MicroBTS site)

From: Jill Bazzell <jbazzel@uswest.com>

Organization: SNELLING

To: "Lavery, Kelly" <Kelly.Lavery@wwireless.com>

[REDACTED]

Dear Kelly,

As per your request, I have enclosed an electronic copy of our application for co-lo tower located at 14th & Fletcher, site number NELI Fletcher, Lincoln Nebraska (Qwest

On October 23, Qwest requested some tower information from you to see if this site i co-locate on, but as of today, have not received any information. We need the Lat. elevation, tower calculations, foundation design, height of the tower and the height tower. I will also need the survey, or your zoning/construction drawings so we can drawings.

Last thing is the lease terms. I do not have any kind of rough draft lease or blank Western Wireless to see if we will even be able to negotiate an acceptable lease for has a blank lease form that we use on our sites, so if Western Wireless does not hav Qwest's'. What is the lease rate on collocations?

I will need the tower information and the lease information before Qwest can proceed co-location. Time is of the essence.

Thank you,
Jill Bazzell

RE: Co-location

Dear Ms. Lavery:

On January 2, 2001, Jennifer Dam of the Lincoln/Lancaster County Planning Department, told us that she had spoken to you and you informed her our co-location application for the site on 12th and Fletcher in Lincoln, Nebraska would be processed in three weeks. On January 10, Ms. Dam said you informed her that we should be having a site walk next week, and the application is being pushed through.

In October, we requested some information from you regarding the tower, but had not received anything. Again on January 3, 2001, we requested the same information regarding the tower and lease details. On Tuesday, January 9, 2001, I talked with Craig Vogt, who was surprised to learn we had not received any information. He said he would look into for me and let me know. I spoke with him again on Wednesday, January 10, 2001, when he told me he found the information I need on the tower and will priority overnight it to me. I now have the tower information I need to proceed, but no lease information. I did talk with Dorothy Kelly, but she can not forward any lease information to me.

If Qwest does not receive any lease information on this site by Friday, January 19, 2001, we will consider Western Wireless unwilling to negotiate a lease with us and will go elsewhere for a site.

Thank you,

Jill Bazzell
Real Estate Consultant
Qwest Wireless, L.L.C.

No: 00-ACE-2626-OE

ISSUED DATE: 01/18/01

GARY E ALCHIN
QWEST WIRELESS LLC
1860 LINCOLN ST, 11TH FLOOR
DENVER, CO 80295

**** DETERMINATION OF NO HAZARD TO AIR NAVIGATION ****

The Federal Aviation Administration has completed an aeronautical study under the provisions of 49 U.S.C., Section 44718 and, if applicable, Title 14 of the Code of Federal Regulations, part 77, concerning:

Description: ANTENNA TOWER, FREQ/ERP 1.8625-1.970 GHZ AT 200 W

Location: LINCOLN NE
Latitude: 40-52-22.11 NAD 83
Longitude: 096-42-40.52
Heights: 125 feet above ground level (AGL)
1397 feet above mean sea level (AMSL)

This aeronautical study revealed that the structure does not exceed obstruction standards and would not be a hazard to air navigation provided the following condition(s), if any, is(are) met:

Based on this evaluation, marking and lighting are not necessary for aviation safety. However, if marking and/or lighting are accomplished on a voluntary basis, we recommend it be installed and maintained in accordance with FAA Advisory Circular 70/7460-1K.

This determination expires on 07/18/02 unless:

- (a) extended, revised or terminated by the issuing office or
- (b) the construction is subject to the licensing authority of the Federal Communications Commission (FCC) and an application for a construction permit has been filed, as required by the FCC, within 6 months of the date of this determination. In such case the determination expires on the date prescribed by the FCC for completion of construction or on the date the FCC denies the application.

NOTE: REQUEST FOR EXTENSION OF THE EFFECTIVE PERIOD OF THIS DETERMINATION MUST BE POSTMARKED OR DELIVERED TO THIS OFFICE AT LEAST 15 DAYS PRIOR TO THE EXPIRATION DATE.

This determination is based, in part, on the foregoing description which includes specific coordinates, heights, frequency(ies) and power. Any changes in coordinates, heights, frequency(ies) or use of greater power will void this determination. Any future construction or alteration,

1-24-01:11:43AM:

003/003

01/24/01 11:47 816 329 2539

ACE-530/510

including increase in heights, power, or the addition of other transmitters, requires separate notice to the FAA.

This determination does include temporary construction equipment such as cranes, derricks, etc., which may be used during actual construction of the structure. However, this equipment shall not exceed the overall heights as indicated above. Equipment which has a height greater than the studied structure requires separate notice to the FAA.

This determination concerns the effect of this structure on the safe and efficient use of navigable airspace by aircraft and does not relieve the sponsor of compliance responsibilities relating to any law, ordinance, or regulation of any Federal, State, or local government body.

A copy of this determination will be forwarded to the Federal Communications Commission if the structure is subject to their licensing authority.

If we can be of further assistance, please contact our office at 816-329-2524. On any future correspondence concerning this matter, please refer to Aeronautical Study Number 00-ACE-2626-OE.

IN OPPOSITIONITEM NO. 3.2: ~~SPECIAL PERMIT NO. 1892~~
(p.57 - Public Hearing - 01/10/01)

January 10, 2001

RE: Permit 1892 to be reviewed at 1:00pm on January 10, 2001
Lot 32, Cumberland Heights, T11N, R6E at 7th & Fletcher Ave.

Attention: Lincoln Lancaster County Planning Department

We are property owners at 535 Pennsylvania Avenue and would like to express our arguments against permit 1892, which permits a new Qwest wireless facility at the location of Lot 32 Cumberland Heights located in the SW quarter of Sec 35.

We believe that the Qwest wireless facility should be placed on an already existing tower rather than destroy our landscape with several different towers for each individual company. We feel they should combine them for the good of the city and also the good of our neighborhood. We already have three large towers within a mile of each other in our area and we do not need another one to look at within blocks of each other. There should be another alternative to this and our suggestion is to combine more than one cellular service on an existing tower. We are property owners and we feel that more cellular towers will not enhance the beauty of our neighborhood. As taxpayers and good citizens, we wish for our voices to be heard. Please keep the City of Lincoln a good place to make our home and keep the towers to a minimum.

Larry and Denise Maack
535 Pennsylvania Ave.
Lincoln NE 68521

IN OPPOSITION:

ITEM NO. 4.1: SPECIAL PERMIT NO. 1892
(p.57 - Cont'd Public Hearing - 1/24/01)

January 18, 2001

RE: Permit 1892 to be reviewed at 1:00pm on January ²⁴20, 2001
Lot 32, Cumberland Heights, T11N, R6E at 7th & Fletcher Ave.

Attention: Lincoln Lancaster County Planning Department

We are property owners in the area of 7th and Fletcher and would like to express our arguments against permit 1892, which permits a new Qwest wireless facility at the location of Lot 32 Cumberland Heights located in the SW quarter of Sec 35.

We believe that the Qwest wireless facility should be placed on an already existing tower rather than destroy our landscape with several different towers for each individual company. We already have three large towers within a mile of each other in our area and we do not need another one to look at within blocks of each other. There should be another alternative to this and our suggestion is to combine more than one cellular service on an existing tower. We are property owners and we feel that more cellular towers will not enhance the beauty of our neighborhood. As taxpayers and good citizens, we wish for our voices to be heard. Please keep the City of Lincoln a good place to make our home and keep the towers to a minimum.

RE: Permit 1892 to be reviewed at 1:00pm on January 18, 2001
Lot 32, Cumberland Heights, T11N, R6E at 7th & Fletcher Ave.

Attention: Lincoln Lancaster County Planning Department

We are property owners in the area of 7th and Fletcher and would like to express our arguments against permit 1892, which permits a new Qwest wireless facility at the location of Lot 32 Cumberland Heights located in the SW quarter of Sec 35.

We believe that the Qwest wireless facility should be placed on an already existing tower rather than destroy our landscape with several different towers for each individual company. We feel they should combine them for the good of the city and also the good of our neighborhood. We already have three large towers within a mile of each other in our area and we do not need another one to look at within blocks of each other. There should be another alternative to this and our suggestion is to combine more than one cellular service on an existing tower. We are property owners and we feel that more cellular towers will not enhance the beauty of our neighborhood. As taxpayers and good citizens, we wish for our voices to be heard. Please keep the City of Lincoln a good place to make our home and keep the towers to a minimum.

To whom it may concern:

I OPPOSE the new zoning on 7th and Fletcher, regarding a new Cellular tower being built.

The location requested for the Cellular tower consist of acreages and would be to close to the homes of the adjoining neighbors.

Please try to work with the existing Cellular towers that are already located around this area, but does not affect the acreage homes.

Thank you
Rich & Chris Grundman
